-ALLOYSALT-P & ALLOYSOLV-

Cleaner, Paint Stripper and Decarboniser

Description:

ALLOY SYSTEM (option 2) is a two part system made up of ALLOYSALT-P, a blended alkaline powder and ALLOYSOLV, a solvent component. It is formulated to remove organic soils, and paint from either ferrous or non ferrous metals. This ALLOY SYSTEM is designed for use in agitated immersion cleaning units.

The ALLOY SYSTEM can be a drop-in replacement for methylene chloride strippers in some applications, only requiring the addition of heating and agitation. Simple air agitation is often adequate.

Features and Benefits:

- Safe on aluminium and zinc.
- Synergistic solvent and detergent action penetrates stubborn soils and paint finishes.
- Emulsifiers assist in suspending oils within the bath and aid in preventing redeposition of oils/paint onto work surface.
- Paint residues easily filtered.
- Drop in replacement for methylene chloride.

Special Note: The ALLOY SYSTEM is generally safe to use on steel, cast iron, aluminium and zinc. But it is not safe to use on magnesium.

Recommended Operating Conditions:

Concentration	:	ALLOYSALT-P	10-25 grams per litre
	:	ALLOYSOLV	10% v/v
Temperature	:	40to 60 ^{O}C	
Time	:	10-60 minutes (depending on soil conditions, paint type* and degree of agitation.).	

*Epoxy and polyurethane paint finishes will require longer contact times. Removal times also depend on the quality of the paint-to-metal bond.

Packaging:

ALLOYSALT-P is available in 25 and 200Kg containers.
ALLOYSOLV is available in 20 and 200 Litre containers
